

WELDING SERVICES

STUDENT SERVICES

Metal Fabrication \$20 minimum
General Welding \$20 minimum
Cutting \$20 minimum

Contact us for a quote.

DHS welders practice safety under fire. Students start with tool identification and purposes, safety practices, and tool maintenance, while learning to apply technical math to the blueprints that dictate their fabrications.

In the lab, students practice oxy-fuel cutting and plasma arc cutting, as well as shielded metal arc, gas metal arc, flux cored arc and gas tungsten arc welding.
