

Duncanville Independent School District

RFP 22-23.003 CONTENT FILTER ADDENDUM

Is Duncanville Independent School District open to considering a fully cloud based solution without a need for a server/appliance onsite? Question is in regard to technical requirement #3 on page 48 of 52

The RFP is not written to exclude a cloud-hosted solution, but it does require cloud-hosted solutions to protect their physical hardware – which is why that statement is written the way it is. No one is being excluded unless they do not actively protect their cloud environment from cybercriminals.
